Used for the tissue transection, resection and anastomosis in thoracic surgery, abdominal surgery, pediatric surgery and gynecologic endoscopy

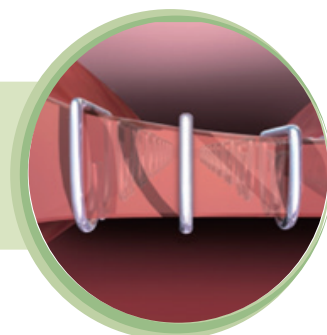

Precise guidance
stable and perfect B shape forming

More Stable
With reinforced nylon, withstand 1000N tension

Stepped staple deliver
graduated compression
and better hemostasis effect

Gripping surface design, increase more friction
provide less tissue slippage

Rotate more precisely 7 levels adjust angle
Maximum left and right 90°

Safer
Overload protection design
prevent shaft bursts
